

## BE SAFE. SLOW DOWN IN WORK ZONES.

Your safety, as well as the safety of your neighbors and our workers, is important to us! We work hard to keep our job sites safe, and we appreciate your effort to slow down and use caution around the construction site.

## We're investing in your neighborhood.

# WATER MAIN REPLACEMENT PROJECT TO START SOON

At New Jersey American Water, we're committed to providing our customers with safe, reliable water service. This requires investing in our treatment and distribution systems, and one of these projects is about to take place near you. The project involves replacing aging water main, as well as utility-owned service lines and fire hydrants along the pipeline route (see reverse for more information about service lines).

## PROJECT OVERVIEW AND WHAT YOU CAN EXPECT

- Perform test pits at the curb.** Before starting the main replacement, we will perform a test pit at the curb by unearthing your service line to identify or confirm its material (see reverse for more information about service lines).
- Install, disinfect, test and place new main into service.** While we interconnect the new main to the distribution system, you may experience a temporary service interruption. You may also experience a slight discoloration of water. If this happens, run the water until it is clear.
- Replace utility-owned service lines and transfer customers to the new main.** Once the main is installed, we'll return to connect customers to the new main. This may involve replacing utility-owned service lines. If we're replacing the utility-owned service line at your property, typically there is a 30- to 60-minute interruption of service while the contractor connects the new service line. We'll attempt to notify you 24 hours in advance. We'll also notify you on the day the service line is replaced with instructions on how to flush your household plumbing prior to using water. It is important that you read and follow these instructions. If you're not home, we'll leave the instructions at your front door. You may want to consider storing a few gallons of water for drinking and cooking during the service line work.
- Perform final paving and any restoration of concrete, driveway, grass and landscaping.**

Our crews will work as quickly as possible to shorten the length of these temporary inconveniences. We appreciate your patience and understanding during this project.

## ABOUT THE PROJECT

**Investment:** WE'RE INVESTING 2.5 MILLION DOLLARS IN SOMERS POINT

**What:** New Jersey American Water is preparing to replace approximately 6,300 feet of aging 6" pipe that was installed between the 1920's and the 1930's with new 16" 12" and 8" pipe on the following streets below. The project includes replacing 6 fire hydrants and 92 customer service lines.

**Where:** Shore Rd -- Meyran Ave to E Harbor Ln  
Maryland Ave -- Bethel Rd to Sunset Ave  
Pleasant Ave -- Shore Rd to Bay Ave  
Bay Ave -- Pleasant Ave to Maryland Ave

**When:** Weather permitting, our local, qualified contractor, Pioneer Pipe Contractors, Inc., is scheduled to begin work on or about March 2nd and expects to be completed within approximately 4 months.

**Work Hours:** Day time work hours will be from 7am to 4pm Monday through Friday.

**Project Contact:** 800-272-1325 Customer Call Center

We're committed to replacing all lead and galvanized service lines by 2031. We encourage customers to visit [newjerseyamwater.com/leadfacts](http://newjerseyamwater.com/leadfacts)

## WHAT'S YOUR SERVICE LINE MADE OF?

Over the years, plumbers have used different service line materials, including copper, PVC, lead, galvanized steel, and others. One way to find out what your service line is made of is to contact a licensed plumber. You can also scan the QR code below for tips to identify your service line material. Additionally, if we find lead piping during our main replacement project, we'll contact you to discuss replacing your service line to reduce your potential exposure to lead. Learn more at [newjerseyamwater.com/Leadfacts](http://newjerseyamwater.com/Leadfacts).

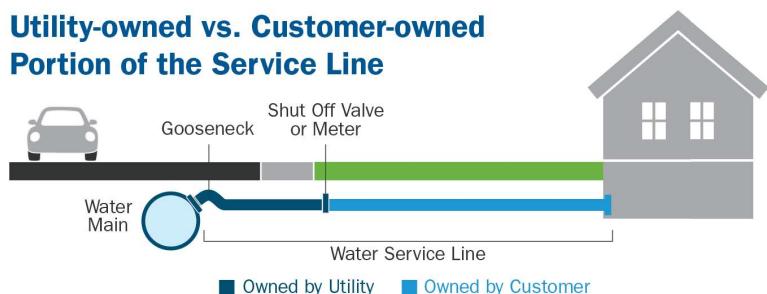

Scan here for tips on how to identify what your service line is made of. Let us know.

## ABOUT SERVICE LINES

There are two components of a service line.

- **Utility-owned portion of the service line:** This is the portion of the service line that extends from the company's main in the street to the company shut off valve (generally located near the curb).
- **Customer-owned portion of the service line:** The property owner is responsible for this portion. It extends from the company shut off valve to the inside plumbing.

## Utility-owned vs. Customer-owned Portion of the Service Line

Please note: This diagram is a generic representation. Variations may apply.

## TRAFFIC FLOW AND ACCESSIBILITY

Sections of street where construction is taking place may be closed during work hours. All traffic control will be coordinated with local police or road authorities. Motorists should use caution, obey traffic signs and follow detour routes when driving in the area.

## NOISE

As with any construction project, some noise will be unavoidable with this project. We apologize for any inconvenience and appreciate your understanding and cooperation.

## SITE MAINTENANCE

The project site will be maintained and cleaned each day before contractors have completed work.

## HOW SHOULD WE REACH YOU IN AN EMERGENCY?

New Jersey American Water uses a mass-notification system to keep customers informed about water-related emergencies and alerts. Log on to MyWater, our online self-service portal at [amwater.com/mywater](http://amwater.com/mywater) to make sure your contact information is up-to-date. While you're there, tell us how you prefer to receive our notifications: by phone, text and/or email.\*

## RIPPLE EFFECT: Investments Create Jobs

Infrastructure upgrades are important investments in public health and safety; they also help support the economic health of the communities we serve. Economic impact studies show that for every \$1 million invested in water infrastructure, upwards of 15 jobs are generated throughout the economy.
